SPOT 7 Update & Division Needs Phase

Daniel Spruill, MPO Staff

NCDOT has released the programming results of the Regional Impact Tier for projects which can be found attached to agenda. Through November, the MPO will assign 2500 local input points to Division Needs and cascaded Statewide Mobility and Regional Impact projects. A draft point assignment for the 2500 local input points for all transportation modes based on the adopted prioritization methodology will be posted to the MPO's website in September. The assignment will follow the target modal mix adopted by the Executive Board in their September 18th, 2024, meeting. The point assignment will be posted for public review and comment through November 19th, 2024, on the CAMPO website. The TCC and Executive Board will be asked to recommend and approve the final point assignment for the Division Needs category at their respective November meetings.
