

Public Engagement Update

October 2022

Public Notices & Comment Periods (CAMPO)

Item	Req'd # of days	Public Comment Period & Public Hearing
Executive Board Action in OCTOBER		
FY 2023 Unified Planning Work Program – Amendment #1	30	Public Comment: Sep. 19 to Oct. 18 Public Hearing: None
Executive Board Action in NOVEMBER		
FY 20-29 Transportation Improvement Program – Amendment #10	30	Public Comment: Oct. 17-Nov. 15 Public Hearing: Nov. 16
Wake Transit FY 23 Work Plan Q2 Amendments	30	Public Comment: Sep. 1-30 Public Hearing: None
Wake Transit Community Engagement Policy	45	Public Comment: Aug. 15-Sep. 29 Public Hearing Oct. 19
Wake Transit Bus Plan – Project Prioritization Policy	-	Public Comment: Nov. 2-15 Public Hearing: None
Executive Board Action in DECEMBER/JANUARY		
Wake Transit Work Plan Amendment Policy Update	-	Public Comment: Aug 15-30 Public Hearing: None

As the Coronavirus continues to constrain public engagement activities that are in-person, added attention has been given to digital engagement, increasing focus on social media platforms, and a reliance on non-traditional means to connect with both the general community and traditionally underengaged populations. To continue moving projects and studies forward, the MPO will need to place additional emphasis on the active support of TCC and Executive Board members, as well as project stakeholder and technical teams in spreading the word about these engagement opportunities. *Please encourage your communications experts to help amplify these messages – thank you!*

CAMPO Projects – Public Engagement Updates

U.S. 401 Corridor Study:

<https://www.US401CorridorStudy.com>

The project team is ~~now in the third~~ in the second phase of the study - Develop Solutions. At the December 8, 2021 Executive Board meeting, a motion was approved to evaluate potential alternative alignments or corridor options for the Future U.S. 401 (bypass). CAMPO staff worked with the

consultant team to conduct this analysis, provided an update to the TCC and Executive Board at their meetings in March, and also received direction to proceed with a scope adjustment including an additional alignment in the analysis for the study. The study has been extended with an updated deadline of June 2023.

The study's third round of public engagement is currently slated to occur from October 25 to November 21, 2022. The study team is working to develop materials with the goal of keeping existing stakeholders in the loop as well as informing new stakeholders along the latest alignments about the study efforts. **Public engagement plans and materials were/will be shared with the CTT at their meeting on Sept. 22; and the Stakeholder Oversight Team meeting on Thursday, October 20, 2022.**

Cary-RTP and Garner-Clayton Rapid Bus Extensions MIS

<https://wakebrtextensionsstudy.com>

This major investment study (MIS) will develop and evaluate alternatives and ultimately select preferred alternatives for two (2) rapid bus or bus rapid transit (BRT) extensions: one from Cary to Research Triangle Park, and another from Garner to Clayton. These extensions would build onto two (2) of the core BRT corridors included in the original Wake County Transit Plan. Three (3) touchpoints of community outreach were planned for each corridor during the study. The first occurred in October 2021 and focused on education while also soliciting feedback on priorities for the investments to inform alternatives development and the development of an evaluation framework. The second, "alternatives development and screening" phase, ended in late April 2022 when the public provided feedback on various alternatives. A public engagement summary report is available on the project website and the technical project team will incorporate the feedback into development of final recommendations for the study. Study results/recommendations will be presented to the Core Technical Teams in early October and the Stakeholder Oversight Teams in late October. **A final round of public engagement is being planned for November/December 2022**, with anticipated recommendation of a Locally Preferred Alternative after the holidays.

Southeast Area Study Project

<https://seareastudyupdate.com/>

The project team conducted the first phase of community engagement throughout July of 2022. The project team will be providing a summary of Phase 1 engagement in the next month or so, which will be presented to the Core Technical Team and Stakeholder Oversight Team, as well as posted to the project website. The project team will now focus on technical analysis to develop a set of draft priorities and improvements, with a workshop for the SOT and CTT slated for this October. Following additional work, **Phase 2 community engagement is likely to occur in early 2023.** Following that, final recommendations will be developed which will be shared through a third and final phase of community engagement to conclude the approximately 18-month long study.

Mobility Management Program Implementation Study

<https://www.campo-nc.us/programs-studies/transit/mobility-management-implementation-study>

This study is unique because, over the course of the study, engagement will generally be targeted to key stakeholders and organizations, individuals directly impacted by these services and any potential program, with less emphasis on the broader public. As part of the first phase, in the first part of 2022, members of the project team shared a kickoff/introductory presentation with decision-making partners and key stakeholder officials, as well as held a stakeholders workshop on April 19th. Two focus groups were held in July and August. The first targeted providers and community human service organizations; the second targeted riders. A summary of both conversations will be shared with the project team and will help inform the development of a draft mobility management program framework, which is anticipated to be presented to stakeholders in the fall as a "White Paper".

Regional Partner Projects – Public Engagement Updates

Greater Triangle Commuter Rail Feasibility Study (GoTriangle = Lead Sponsor)

GoTriangle presented a copy of the draft results for the Feasibility Study to governing boards and key stakeholders in August of 2022. Based on feedback from those presentations, additional analysis has been conducted before the report is finalized. An updated draft has been presented to the GoTriangle Board of Trustees, which will also be shared with the Transit Planning Advisory Committee (TPAC) and the CAMPO Executive Board. **Community engagement, the public release of the report for information and feedback, is anticipated to begin in January of 2023.** <https://www.readyforrailinc.com/>

Wake Bus Rapid Transit Projects (City of Raleigh = Lead Sponsor)

In an effort to ensure transparency and accessibility to information about the progress of the four central BRT projects in Wake County, **in November 2022, the GoRaleigh project team will be providing a comprehensive informational update to the community.** The anticipated plan is to provide updates across multiple mediums (online, in person popups/tabling, virtual “Ask a Planner” events, and more). <https://raleighnc.gov/bus-rapid-transit>

Wake Durham Bus Plan Update (GoTriangle = Lead Sponsor)

GoTriangle is working with regional partners to update the Wake Bus Plan which will recommend how and when the Wake Transit Plan invests transit funds between 2025-2030. Public engagement activities took place during the month of May and feedback will guide recommendations for transit investments. The current phase of the project is working to prioritize and develop a recommended program specific transit service improvements –short and mid-term (2-7 years). The rest of 2022 will be spent developing the Draft Short Range Transit Plans (FY25-FY27) and Draft Wake Bus Plan. As part of that process, the Executive Board will consider approval of a Project Prioritization Policy for the Plan at their November 2022 meeting. **The draft policy will be available for public comment from Nov. 2-15. The actual Draft Short Range Transit Plans and Draft Wake Bus Plan will have a larger, final phase of public engagement in early 2023.** This engagement will likely be integrated with the public engagement plans for the FY24 Wake Transit Work Plan. For more info, as well as the location where the summary of the engagement will be available, visit: <https://www.publicinput.com/WBPA5> or <https://goforwardnc.org/bus-plans-project>.

Wake Transit Community Engagement Policy Update (GoTriangle = Lead Sponsor)

The Transit Planning Advisory Committee’s (TPAC) Community Engagement Subcommittee and the Communications and Engagement Team at GoTriangle have developed an update to the Community Engagement Policy, which ultimately will need adoption by both the CAMPO Ex. Board and GoTriangle Board of Trustees. The public comment period spanned Aug. 15-Sept. 29, with a **public hearing scheduled for the October 19th Executive Board** meeting. <https://www.goforwardnc.org/wake-county-comment-period/notice-of-public-hearing/>

Public Engagement Planning (CAMPO)

CAMPO staff are actively engaged with public and stakeholder engagement planning for the following projects/studies. This is in addition to typical technical analysis, reviews, and engagement as key stakeholders for member organization projects (i.e. SPOT process, STIP/TIP project development, local Comprehensive Transportation Plans, LAPP investments, and transportation studies).

Engagement Anticipated for Fall (October-December 2022)

- Commuter Rail Feasibility Study
- Triangle Region’s Household Travel Survey (began on Sept. 26)
- Transit Riders On-Board Surveys
- Rapid Bus Extensions Major Investments Study (Cary-RTP and Garner-Clayton)
