2045 Metropolitan Transportation Plan (MTP) Amendment
FY 2018-2027 Transportation Improvement Program (TIP) Amendment
Air Quality Conformity Determination
Chris Lukasina, CAMPO Staff

As a result of recent changes in federal guidance, the Capital Area MPO is once again required to demonstrate conformity between the MTP and TIP for air quality. A required step is the development of an Air Quality Conformity Determination analysis and report. This is required for updates and changes to the MTP and/or the TIP. A required step in the amendment of the FY 2018-2027 Transportation Improvement Program (TIP) is to ensure that it conforms to the 2045 Metropolitan Transportation Plan (MTP). This includes verifying that the timing, scope, and cost of projects in the plan and program are the same.

CAMPO staff has been working with the NC Department of Transportation, Division of Air Quality (DAQ), and the NC Department of Environment and Natural Resources (DENR) to implement the updates necessary for the required air quality conformity determination, including locating and resolving all differences between the latest updates to the TIP and the MTP. Attached is the draft Air Quality Conformity Determination report and necessary updates to the both the TIP and MTP to meet air quality conformity requirements. A copy of the Air Quality Determination report and the updated MTP and TIP was posted online at <http://www.campo-nc.us/transportation-plan/air-qualityconformity>. A public comment period is open until January 16, 2019 and a public hearing will be scheduled for January 16, 2019. On January 3, 2019, the TCC recommended approval of the Air Quality Conformity Determination Report and requisite 2045 MTP and 2018-2027 TIP amendments.

Requested Action: Conduct public hearing. Consider approval of the Air Quality Conformity Determination Report and requisite 2045 MTP and 2018-2027 TIP amendments.
